KEY PARTNERS

BUSINESS DESCRIPTION

We are a company with dedicated team of developers and professionals that enable change and paradigma shift. We gain the full control of Data-Chain starting from Sensing device and including management systems. We promote digitalization and digital transformation in businesses by developing full-solutions that ensure quality, precision, and sustainability in data and information management.

VISION

We want to boost territories with a technological and cultural revolution

MISSION

In a VUCA World with increasing complexity, we supply tools and techs to SME and Startup, supporting their evolution, their going concern and their competitiveness.

PROBLEM

Organization requires qualities information on their processes and contexts to stay competitive in the global market. Wrong DATA causes 1.7 Trillion \$ losses.

SOLUTION

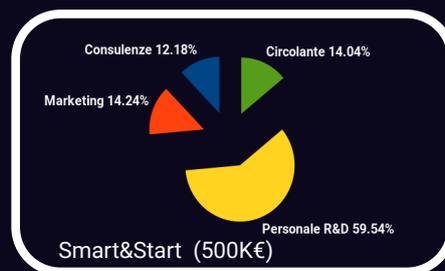

A set of tools and tech integrated in the ΘΔZ Platform, able to produce, elaborate and evaluate the best choices in any processes.

Founded in Sep 2018

INVESTMENT

500K€ - R&D in previous Years

TECNOLOGY

ΘΔZ FRAMEWORK

Integrated Development Environment like ArduinoIDE

an original NoSQL DATABASE like MongoDB

cutting edge awesome WEB STACK like WordPress

Custom DEVICES like ArduinoBoard

WHY CHOOSE US ?

- Full control of Data-Chain ensure data-quality and security
- AIoT full integration enable traceability and consistency
- TinyML offers exponential reduction of power consumption
- Able to work offline and in extreme rural environment
